## HANDBOOK OF NATURE STUDY (PAPERBACK)

Cornell University Press, United States, 1986. Paperback. Book Condition: New. 1st New edition. 236 x 155 mm. Language: English . Brand New Book. A matchless handbook for decades, this classic work has been the natural history bible for countless teachers and others who seek information about their environment. Written originally for those elementary school teachers who knew little of common plants and animals, and even less about the earth beneath their feet and the skies overhead, this book is for the most part as valid and helpful today as it was when first written in 1911 and revised in the spirit of its authors by a group of naturalists in 1939. After all, dandelions, toads, robins, and constellations have changed little since then! And modern society's concern with the quality of life and the impact of people on soil, water, and wildlife makes this book even more relevant. Of the living things described, most are common in the northeastern states, and many, such as the dandelion, milkweed, and mullein, and the house mouse, muskrat, and red fox, are so widespread that people living outside the United States will recognize them easily. Anna Botsford Comstock very appropriately took the view that we should know first and best the things closest to us. Only then, when we have an intimate knowledge of our neighbors, should we, journey farther afield to learn about more distant things. Teachers and children will find the material in this book invaluable in that regard. Details of the most common, but in some ways the most interesting, things are brought out, first by careful, nontechnical descriptions of the things themselves and...
