Googles ChromeBook has been around for a couple of years now, but it has mostly taken a backseat to the companys stable of Android devices. With the recent release of the next generation of ChromeBooks, Google is finally giving this new computing platform the attention it deserves. No longer are people forced to choose between Windows and Mac and if Google has anything to say about it, the ChromeBook platform will grow by leaps and bounds in the years to come. The concept behind these devices is both simple and revolutionary. Since most of our computer use takes place within a browser, why not eliminate the need for standalone programs altogether The ChromeBook is a not only a new series of devices, but a new computing paradigm. Automatically updated and free from viruses and malware, its the most secure operating system available today. By harnessing the power of the Internet, the ChromeBook can do pretty much anything that more expensive PCs are capable of. Its everything you need, and none of what you dont. Over the course of...
