Critical review on different types of plumes and jets

By Muhammed Ernur Akiner

GRIN Verlag Nov 2015, 2015. Taschenbuch. Book Condition: Neu. 211x149x3 mm. Neuware - Literature Review from the year 2015 in the subject Environmental Sciences, grade: 3, Akdeniz University (Vocational School of Technical Sciences), language: English, abstract: Two papers are critically reviewed in this study: 'Bench-Scale Investigation of Inclined Dense Jets' by Cipolla and others (2005) and 'Vertical Penetration of Double-Diffusive Water Plumes Discharged Vertically Downward' by Pantokratoras (2003). The main goal is to provide new experimental information on the behavior of dense jets issuing from nozzles variously inclined on the horizontal plane. Also, to develop suitable Froude number equation for double diffusive plumes, in which discharge temperature is greater than that of the ambient water whereas the discharge salinity is smaller than that of the ambient sea water. Another objective is to prove the Turner`s Equation (Pantokratoras 2003) is unsuitable for double diffusive plumes and to develop this equation. Most of the investigations on dense jet diffusion dealt with jets issuing vertically in the environment, despite the fact that it has been long known that inclined dense jets result in higher values of dilution. The water temperature in the tank (1.5 m long, 0.45 m wide, filled with water up...
